CREATING REPOSITORY IN IBM CLOUD:

The screenshot shows the IBM Cloud Container Registry interface. On the left is a dark sidebar with navigation links: 'Container Registry', 'Quick start', 'Namespaces' (0), 'Repositories' (0), 'Images' (0), 'Trash' (0), and 'Settings'. The main area is titled 'Repositories' and features a 'Create repository' dialog box. The dialog box has a close button (X) in the top right corner. It contains two steps: 1. 'Tag an image to point to this registry. Choose a local image, target namespace, and target repository.' with the command `docker tag <local_image> icr.io/<my_namespace>/<my_repo>`; 2. 'Push the tagged image.' with the command `docker push icr.io/<my_namespace>/<my_repo>`. Each command is followed by a copy icon. In the background, a 'Create' button and a '+ ' icon are visible.

Repositories

Create repository

1. Tag an image to point to this registry. Choose a local image, target namespace, and target repository.

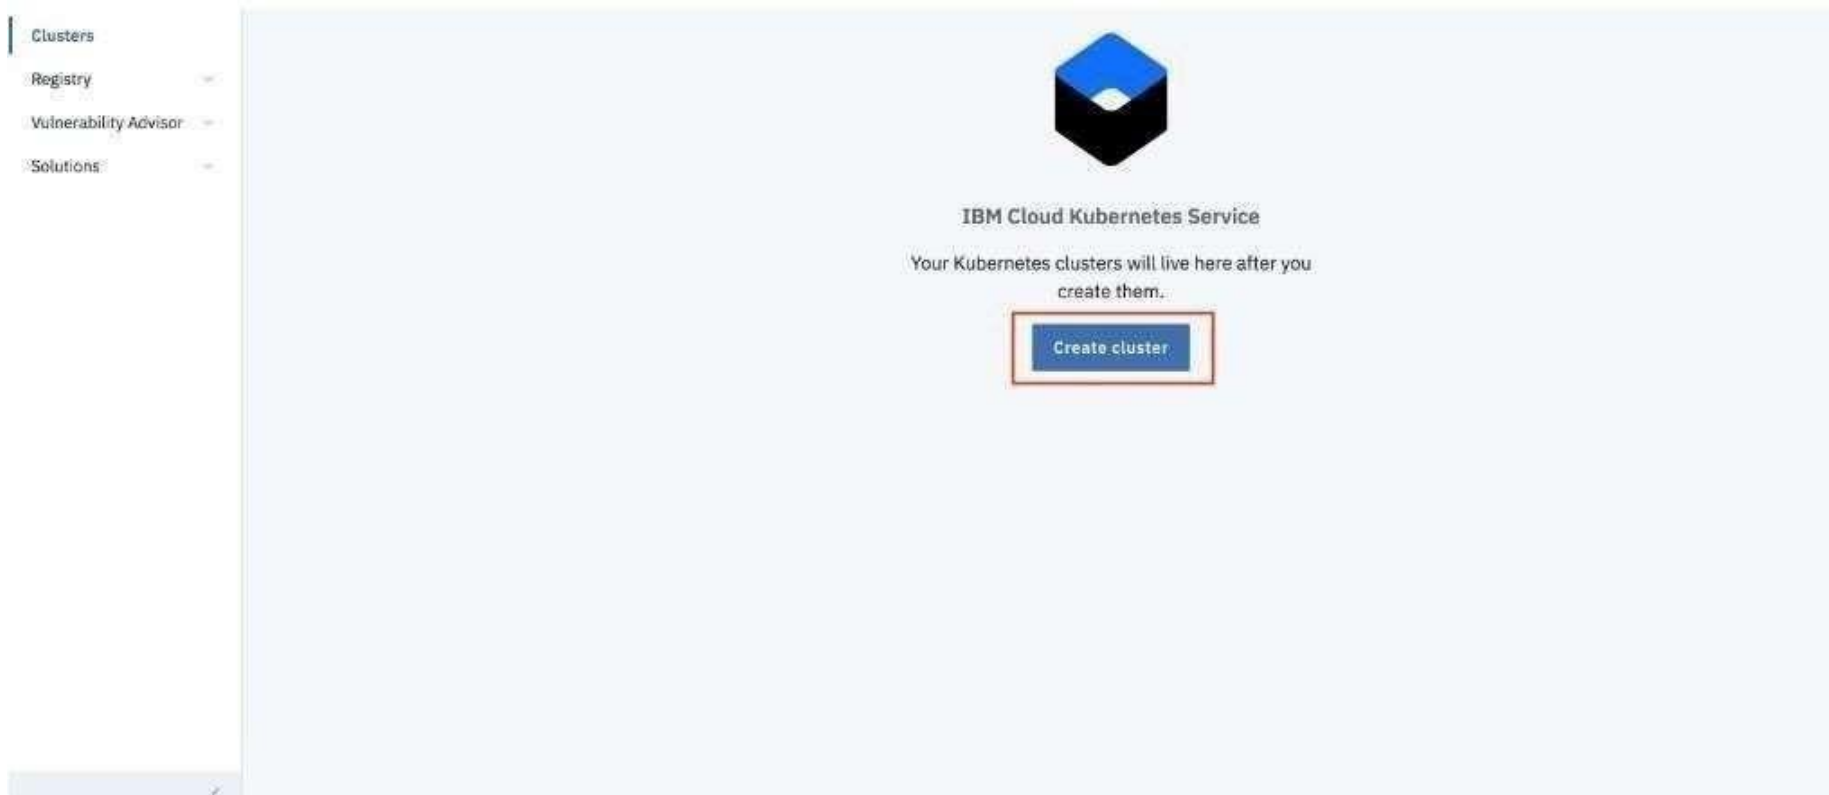

```
docker tag <local_image> icr.io/<my_namespace>/<my_repo>
```

2. Push the tagged image.

```
docker push icr.io/<my_namespace>/<my_repo>
```
